Welcome to Intellifi!
Let's Get Your Intellifi Network Set Up!

We're excited to get your new Intellifi Wi-Fi network set up and running.

Step 1: Download the Intellifi app

1. Scan one of the QR codes to get the app.
2. Create your account using your email id and password to set up your Intellifi account.

Download on the **App Store**

GET IT ON **Google Play**

Step 2: Connect the app to the controller

1. Login to your Intellifi app using your email id and password.
2. You should see an on-screen prompt to "setup your Intellifi WiFi network". Select "Start new network"
3. Follow the on-screen instructions to connect the app to your controller (claim the controller).
4. To extend coverage, click "add Intellifi satellite" and follow the on-screen instructions.
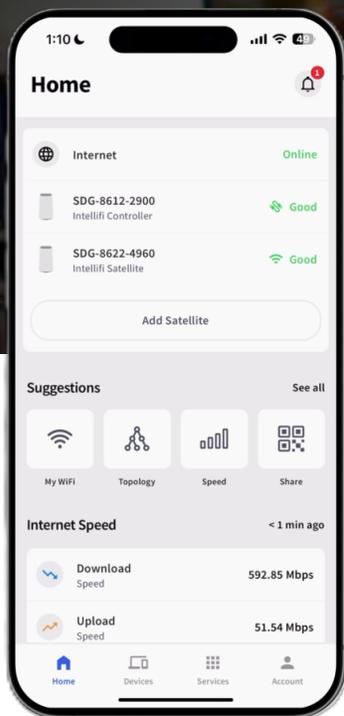

New Intellifi Controller

✅ **Ready to add**
Before continuing, check the MAC address above matches the one printed on the label on the bottom of your Controller. We want to make sure we found the correct device.

Add Controller

Set up an Intellifi Satellite?
Now that your Intellifi network has been set up, you can add Intellifi Satellite devices to expand your WiFi network coverage.

Add Intellifi Satellite

Finish setup

Enjoy Your New Intellifi Service!
